TECHNICAL SKILLS

Languages: C/C++, SQL, Python, Machine Learning, Deep Learning

Libraries: NumPy, Pandas, Matplotlib, Scikit-learn, TensorFlow, OpenAI, PIL, gTTS.

Methodologies: Agile, CI/CD, Test-Driven Development (TDD), CRM

Developer Tools: Git, GitHub, Postman, Power BI.

Coursework: Data Structures and Algorithms, Operating Systems, Computer Networks, DBMS, Software Engineering, Artificial Intelligence and Machine learning.

EXPERIENCE

Skill Development Centre (AI/ML - Trainee)

Jan 2026 – Present

Chetu inc.

Noida

- Currently training in Data Analysis, Machine Learning, and Deep Learning, with hands-on exposure to ANN and CNN architectures for real-world problem solving.
- Developing and implementing practical AI/ML projects focused on real-world use cases such as prediction, classification, and pattern recognition, strengthening applied understanding of algorithms and model evaluation.
- Actively working in a team-based learning environment, participating in group discussions and peer reviews to improve problem-solving approaches, model design, and communication of technical ideas.

Summer Research Intern

June 2025 – July 2025

National Institute of Technology

Bhopal

- Data analysis on the Industrial Control System (ICS) Flow 2023 dataset, with a focus on cybersecurity threat detection.
- Conducted feature engineering, data preprocessing, and anomaly detection using Python-based tools and Jupyter Notebook for visualization and exploratory analysis.
- Achieved highest accuracy of 98.5% in XGBoost, 98.3% from CatBoost and 97.7% from CNN.

PROJECTS

AI Powered Virtual Doctor Assistant | Python, Ensemble Learning, NLP, Fast API, React

Github – Link

- Engineered a Multi-lingual doctor assistant app to provide a real-time emergency support for patients.
- Boosted dev productivity by 30% using AI-driven code to analyze patient symptoms and generate context-aware responses.
- Improved system performance by reducing model loading time.

Movie Recommendation System | Python, Machine Learning, API, Streamlit,

Github – Link

- Implemented a content-based Movie Recommendation System using Python and scikit-learn to analyze the IMDB movies database and generate recommendation.
- Applied Count Vectorizer and Cosine Similarity to generate personalized recommendations from a dataset of thousands of movies.
- Enabled real-time insights and delivered an interactive Streamlit-based Movie Recommendation System integrating TMDB API for poster retrieval and real-time personalized suggestions.

EDUCATION

Jaypee University of Engineering and Technology

Guna, India

B. Tech, Computer Science and Engineering

Aug 2022 – May 2026

Jai Academy, School

Jhansi, India

Class 12

Jan 2020 – July 2021

ACHIEVEMENTS

Hackathon Participant– Innovate2Educate (Hack2Skill Platform): Participated in the national-level hackathon.

LeetCode & GeeksforGeeks: Solved 80+ problems demonstrating strong consistency and DSA fluency.

Infosys Springboard & HackerRank: Completed certifications in Python and Natural Language Processing from Infosys Springboard, and SQL (Basics) from Hacker Rank.
